

COQ D'ARGENT

The Sustainable Sommelier

Kick off 2019 with the aim to take better care of our planet. We don't need to make huge changes to do this, it can be the small things like drinking a wine that doesn't have a carbon footprint or choosing a wine from an organic vineyard

We have put together a list of wines that are either Organic, Biodynamic or sustainably sourced.

Here are some options picked from our list:
